Vet Med BINGO

How to Play Vet Med Bingo

Just like regular Bingo, the goal of Vet Med Bingo is to be the first player to match a specific pattern of numbers on your card with those drawn by the caller.

Your Vet Med Bingo game includes

1. **6 Different Vet Med Bingo Cards Each.**
Player receives a card with a 5x5 grid, containing 24 phrases and one free space in the center.
2. **A page of Vet Med Bingo "Phrases".**
Cut up and fold the phrases so the caller can randomly draw and announce the spaces.

Vet Med Bingo Gameplay

1. **Starting the Game:** The caller shuffles the Vet Med Bingo folded paper sheets and draws one at a time, announcing the name of what's located in the space.
2. **Marking Your Card:** If the announced number appears on your card, mark it.
3. **Winning Patterns:** The first player to complete the predetermined pattern calls out "Vet Med Bingo!" to win. Common patterns include:
 - Horizontal Line: Marking all five numbers in any row.
 - Vertical Line: Marking all five numbers in any column.
 - Diagonal Line: Marking five numbers diagonally across the card.
 - Four Corners: Marking all four corner squares.
 - Full Card (Blackout): Marking every number on the card.

Winning

1. **Verification:** Once a player calls "Bingo," the caller verifies the numbers against the drawn numbers. If correct, the player wins the round.
2. **Multiple Winners:** If more than one player calls "Bingo" simultaneously, they share the prize or play a tiebreaker round.

Variations:

- Players can agree on different patterns before starting the game (e.g., X-shape, T-shape, or other custom designs).
- Rather than traditional Bingo rules, challenge players to complete the actions on their bingo card during the workday. The first to complete the actions in a Bingo formation during the established timeframe is the winner.

End of Game:

The game continues until the predetermined number of rounds are played or a set number of winners is reached.
